

# Professional VR Recording

Apollo makes it possible to record multiple channels of 4K/UHD/HD in a professional codec with all footage synced and organized for post-production.

## apollo

MULTI-CAMERA RECORDER/MONITOR

- Dual 4K/UHD or 4-Channel 1080p60
- Simplified Setup & Workflow
- No Transcoding Necessary
- Extended Record Times
- Perfectly Synced Audio/Video
- Apple ProRes/Avid DNxHD
- Lightweight & Portable
- Proven Performance
- SDI and HDMI I/O

DNxHD

ProRes

The Convergent Design Apollo is a truly portable Multicamera Monitor/Recorder/Switcher. Record Apple ProRes in 4K up to 60fps, Dual-4K up to 30fps or four channels of 1080p up to 60fps. While recording four simultaneous HD signals, Apollo can also record and output a fifth HD video track of a Live-Switch between the four inputs or a Quad-Split view. 4K and HD can be input via HDMI, 3G-SDI and 6G-SDI for maximum versatility. Multiple Apollo units can be connected to expand channel capacity, with all channels perfectly synced to start frame.
