

Only Apollo Delivers Portable Four Camera Video Assist...

Simultaneously record four cameras from a tablet-sized portable device. View as a quad-split and readily switch between camera signals, even in playback.

- Quad-HD Monitor/Record/Play
- Switched or Quad-View
- Touchscreen Interface
- Hours of ProRes Recording
- Three Independent Outputs
- Wireless and Battery Accessories
- SDI and HDMI I/O

apollo
Portable Multi-Camera
Video Assist

Move better, setup faster and work smarter. With four HD video inputs, Apollo is a complete Multi-Camera Video Assist device that eliminates multiple recorders, switchers and other gear on set. View four cameras simultaneously or switch between them in perfect sync during record and playback. Apollo outputs three customizable views to other monitors (Quad-Split, A Camera, and B Camera) while recording Apple ProRes. Add battery power and wireless for total mobility on set. Apollo's power, flexibility and lightweight compact size make it *the* Video Assist choice for any shoot.

ODYSSEY
APOLLO OPTION

Also available as an upgrade for the Odyssey7Q and Odyssey7Q+

See it work on the set of USA Network's Sirens TV Series
